STINGER-JIMMY JAMMER-AUTO WELD

AUTOMATIC WELDING SYSTEMS

Stinger Production Equipment,

Provides just the right positioning equipment to increase your welding production. All you do is pick the components for your size pipe, flanges etc. Auto Weld Systems (Jimmy Jammer) are composed of a manipulator, weld oscillator, cross slide, positioner & turning rolls. All of our units are plug-n-play. The Auto Weld Oscillator controls the positioners and turning rolls. Just pick the size you need and plug it in for complete control of your welding process. Add your Miller welding equipment and increase your production today.

10 Ton Capacity
2"-72" Pipe
110 Volt Input
